

It is my request you strongly consider keeping the Wisconsin Do Not Call requirements in place. It should be my responsibility to contact individuals I am interested in doing business with. I do not appreciate being contacted by rude companies trying to sell their goods. Many times the tactics they employ are far from credible. Furthermore, I become especially frustrated when these companies contact the elderly and the young and take advantage of them when they do not fully understand the tactics being used to try to get people to agree to something over the telephone. Again, if a service is needed we should have the right to seek out businesses. Thank you for any consideration to this request.
